#3.Idea Forge: Idea Forge is a Mumbai based startup, which jointly developed the Netra with Defence research and Development organization. The Netra is a lightweight, autonomous UAV used for surveillance. The customers of Idea Forge include the central reserve police force and Uttar Pradesh special task force.

#4.Aurora Integrated Systems: Aurora Integrated systems are one of the pioneers in UAV technology. This Bangalore based company is the first company to develop the technology in India without any help from foreign countries. The company is funded by Tata group and the Ministry of science and technology. The Aurora Integrated systems works on technologies like vision systems, aerodynamic design and optimization. This company was started by seven graduates from IIT Kanpur.

#5.Garuda Robotics: Garuda Robotics is a company which offers software and services to the UAV industry. The firm was founded by Pulkit Jaiswal and deals with both software and hardware for drones and designs them based on client requirement. The company won an award at the startup arena Jakarta 2013 for its coffee delivering drones.
